

GREEN SERVICE

BASIC

Our BASIC package offers everything you need. Service competence with 24/7 controlling. Ideal for old systems with reduced remuneration. Do you want that and more? And a full overview of all costs? WIND NOW delivers solutions.

FULL SERVICE. GREEN STANDARDS

GREEN SERVICE BASIC

Our GREEN SERVICE BASIC maintenance package includes all necessary maintenance, including consumables such as greases and lubricants - flanked by our powerful 24/7 control center. The control system detects, reports and rectifies faults via remote maintenance. GREEN SERVICE BASIC is ideal for old systems with reduced remuneration, for example. Depending on your needs, you as the operator decide whether and which services from our extensive portfolio should be added, depending on the condition of the system. Advice included! You retain full control over the costs with the best WIND NOW service!

Maintenance

Annual maintenance according to manufacturer's specifications incl. report preparation If applicable, half-yearly maintenance according to manufacturer's specifications incl. report preparation

Consumables

For maintenance/semi-annual maintenance (greases, oils, lubricants, filters)

Remote monitoring

24/7 monitoring incl. fault diagnosis and remote repair in the event of a malfunction

OPTIONAL

FULL SERVICE. GREEN STANDARDS

In addition to our maintenance packages, we can offer you a large catalogue of additional services based on our many years of experience and cooperation with wind-proven partner companies. These can be booked separately for each maintenance package. Just like individual services from our respective packages. In this way, you receive all services from a single source.
